印度乘法

印度乘法口诀

©太阳

$$13 \times 12 = ?$$

Step1: $13 + \text{乘数的个位数} 2 = 15$

Step2: $15 \times 10 = 150$

Step3: $\text{被乘数的个位数} 3 \times \text{乘数个位数} 2 = 6$

Step4: 将第2步和第3步相加 $150 + 6 = 156$

$$13 \times 12 = (13 + 2) \times 10 + 3 \times 2 = 156$$
